📊 Statistics (42.50)

Signatures

- Checks available memory
- Queries the keyboard layout
- SetUnhandledExceptionFilter detected (possible anti-debug)
- Possible date expiration check, exits too soon after checking local time
- Guard pages use detected - possible anti-debugging.
- Resumed a thread in another process
- Reads from the memory of another process
- The binary likely contains encrypted or compressed data
- Creates RWX memory
- Resolves a suspicious Top Level Domain (TLD)
- Yara detections observed in process dumps, payloads or dropped files
- Anomalous binary characteristics
- Binary compilation timestomping detected
- Created network traffic indicative of malicious activity
