

Threat Intelligence Implementation Guide

Part 1: Analyze Two Indicators of Compromise (IoCs)

Step 1: Select Two IoCs

- Example IP: 45.77.56.123
- Example File hash: e99a18c428cb38d5f260853678922e03 (MD5)

Step 2: Research and Detect the IoCs

- For IP: Search firewall/SIEM logs, check OTX, VirusTotal, AbuseIPDB for reputation.
- For File Hash: Search endpoint logs, scan with VirusTotal.
- Record method/tool used and take a screenshot.
- Summarize why this IoC is a threat.

Step 3: Explain How IoCs Indicate Threats

- Example: "Connections to this IP indicate C2 activity."
- Example: "Detection of this hash indicates known ransomware."

Part 2: Implement OpenCTI Platform

Step 1: Prepare Environment

- Install Docker & Docker Compose.

Step 2: Download and Start OpenCTI

```
git clone https://github.com/OpenCTI-Platform/docker.git opencti-docker  
cd opencti-docker  
docker-compose pull  
docker-compose up -d
```

Step 3: Access OpenCTI

- Browser: <http://localhost:8080>
- Login: admin@opencti.io / ChangeMe
- Take dashboard screenshot.

Part 3: Configure and Integrate Two Connectors

Step 1: Choose Two Connectors (e.g., MISP, OTX, VirusTotal)

Step 2: Edit Configuration

- Edit connector `.env` or `docker-compose.yml` (add API keys, URLs).

Step 3: Start Connectors

- ```
docker-compose up -d
```
- Verify connectors in OpenCTI UI (Connectors tab).
  - Screenshot connectors online.

### Step 4: Document Integration

- List connector names, roles, config snippets, and dashboard evidence.

---

#### Part 4: Demonstrate Basic Usage

- Search one IoC in OpenCTI, show enrichment/sightings.
- Screenshot and explain findings.

---

#### Documentation Checklist

- Screenshots: Setup, dashboard, connectors, search results
- Config file/YAML snippets
- Written steps and findings

---

#### Example Report Structure

##### 1. IoC Analysis

- IoC, detection method, evidence, threat summary

##### 2. OpenCTI Platform Setup

- Steps, issues, screenshots

### 3. Connector Integration

- Connectors added, config, evidence

### 4. Basic Usage Demo

- Search results, screenshots, explanation

### 5. Discussion

- Value of threat intelligence, limitations, next steps
