🔒 CYBERSECURITY CAREER FOCUS

I'm transitioning into Cybersecurity with a focus on SOC analysis, threat detection, and vulnerability assessment. Currently building hands-on experience through simulated SOC environments that mirror real-world threats and incident response. I bring a creative and analytical mindset shaped by 8+ years in design and visual communication—skills that help me turn technical findings into clear, actionable insights.

🔧 TECHNICAL PROJECTS

Divide & Defend: A Hands-On SOC Lab Project with Micro-Segmentation

2025 – Capstone Lab Project

- Built a home-based SOC lab with VMs simulating attacker, victim, and SIEM nodes
 - Simulated attacks using Nmap, Hydra; configured detection rules in Wazuh
 - Implemented micro-segmentation with UFW, iptables, and Windows Firewall
 - Parsed logs from Windows and Linux agents to identify brute-force, new user creation, and unauthorized access
 - Conducted incident triage, threat hunting (OTX, MISP, AbuseIPDB), and vulnerability scans with Nmap/OpenVAS
 - Final output included a professional report with IOC analysis, detection maps, and remediation plans
-

👛 PROFESSIONAL EXPERIENCE

Photographer & Graphic Designer

SSNUS – Norwalk, CT | 2020 – Present

- Maintained organized digital asset management with secure FTP workflows
- Launched SEO-optimized product site with structured metadata
- Applied disciplined file versioning and naming conventions to large digital libraries

Freelance Graphic Designer & Video Editor

Fiverr | 2016 – Present

- Delivered cross-platform design assets for branding, UI/UX, and marketing campaigns

- Edited videos and animations for campaigns while maintaining consistency and quality
- Maintained communication and secure file delivery through cloud collaboration tools

Post-Production Editor

Aventura TV – Venezuela | 2015 – 2017

- Edited TV and digital content end-to-end, including color grading and sound syncing
 - Coordinated with producers to align deliverables with campaign goals
 - Ensured quality control and technical accuracy in all final releases
-

CERTIFICATIONS

- **Google Cybersecurity Professional Certificate**
Completed comprehensive training in network security, threat analysis, SIEM tools, and incident response fundamentals.
-

TECHNICAL SKILLS

Cybersecurity

- SIEM Tools: Splunk, Elastic (ELK), Wazuh
- Log Forwarders: Winlogbeat, Filebeat, Auditd
- Threat Intelligence: OTX, AbuseIPDB, MISP
- Firewalls: iptables, UFW, Windows Firewall
- Attack Tools: Nmap, Hydra, Metasploit (basic)
- Vulnerability Scanning: OpenVAS, Nessus
- Incident Response & Triage

Additional

- Python (beginner), HTML/CSS
 - Adobe Creative Suite (Photoshop, Illustrator, InDesign, Premiere Pro, After Effects)
 - FTP (Cyberduck), GitHub, Monday.com, Notion
 - Prompt Engineer, Figma, Microsoft word, Microsoft Excel
-

CORE STRENGTHS

- **Problem-Solving:** Creative and analytical thinker with strong technical reasoning

- **Visual Communication:** Able to present complex data clearly using diagrams and reports
 - **Dependability:** Known for being calm, reliable, and deadline-focused
 - **Growth Mindset:** Receptive to feedback, highly motivated to learn and mentor
 - **Team Collaboration:** Enjoy working cross-functionally; exploring quiet leadership roles
-

PROFESSIONAL DEVELOPMENT

- Completed Google Cybersecurity Certificate
 - 3-month cybersecurity capstone lab with focus on SOC workflows
 - Active contributor to GitHub portfolio projects (SOC tools, Python, visual reporting)
 - Building presence on LinkedIn and developing personal branding
-

EDUCATION

Faculty of Architecture and Design

La Universidad del Zulia

 2010 – 2015 |  Maracaibo, Venezuela

Google Cybersecurity Certificate

Coursera

 2024 – 2025 |  Stamford, CT
