CYBERSECURITY CAREER FOCUS

I'm transitioning into Cybersecurity with a focus on SOC analysis, threat detection, and vulnerability assessment. Currently building hands-on experience through simulated SOC environments that mirror real-world threats and incident response. I bring a creative and analytical mindset shaped by 8+ years in design and visual communication—skills that help me turn technical findings into clear, actionable insights.

TECHNICAL PROJECTS

Divide & Defend: SOC Lab Project with Micro-Segmentation & Real-Time Monitoring 2025 – Capstone Lab Project

- Built a home-based SOC lab with multiple VMs simulating attacker, victim, and SIEM nodes
- Deployed **Wazuh as the primary SIEM**, creating custom detection rules for brute-force, privilege escalation, and unauthorized access
- Simulated attacks using Nmap and Hydra; captured logs from Windows and Linux agents
- Implemented micro-segmentation with UFW, iptables, and Windows Firewall for traffic isolation
- Conducted incident triage and threat hunting with OTX, MISP, and AbuseIPDB
- Performed vulnerability scans using Nmap and OpenVAS
- Integrated **Grafana dashboards with Wazuh** to visualize real-time SOC metrics and detection trends
- Configured **alerting workflows in Grafana** to send notifications directly to **Discord channels** for faster incident response
- Delivered a professional report with IOC analysis, detection dashboards, and remediation plans

PROFESSIONAL EXPERIENCE

Photographer & Graphic Designer

SSNUS – Norwalk, CT | 2020 – Present

- Maintained organized digital asset management with secure FTP workflows
- Launched SEO-optimized product site with structured metadata
- Applied disciplined file versioning and naming conventions to large digital libraries

Commented [JN1]:

Gabe

- Add a head shot perhaps
- Add your linkedin
- Good set of personal experience
- Try to shorten to 2 pages max
- good categories in your resume, maybe add a personal section like who you are and not just the technical aspect

Matt

- Perhaps add a LinkedIn link
- Could maybe add more space between your lists

Freelance Graphic Designer & Video Editor

Fiverr | 2016 – Present

- Delivered cross-platform design assets for branding, UI/UX, and marketing campaigns
- Edited videos and animations for campaigns while maintaining consistency and quality
- Maintained communication and secure file delivery through cloud collaboration tools

Post-Production Editor

Aventura TV – Venezuela | 2015 – 2017

- Edited TV and digital content end-to-end, including color grading and sound syncing
- Coordinated with producers to align deliverables with campaign goals
- Ensured quality control and technical accuracy in all final releases

CERTIFICATIONS

- **Google Cybersecurity Professional Certificate**
Completed comprehensive training in network security, threat analysis, SIEM tools, and incident response fundamentals.

TECHNICAL SKILLS

Cybersecurity

- **SIEM Tools:** Wazuh (primary SOC tool)
- **Log Forwarders:** Winlogbeat, Filebeat, Auditd
- **Threat Intelligence:** OTX, AbuseIPDB, MISP
- **Monitoring & Visualization:** Grafana (dashboards, SOC metrics, Discord alerting)
- **Firewalls:** iptables, UFW, Windows Firewall
- **Attack Tools:** Nmap, Hydra, Metasploit (basic), Kali Linux attacker VM
- **Vulnerability Management:** OpenVAS, Nessus
- **Operating Systems & Virtualization:** Parrot OS (agents), Kali Linux, Windows, UTM (Apple Silicon virtualization)
- **Incident Response & Threat Hunting:** Detection rule tuning, triage workflows, IOC analysis, remediation plans
- **Command Line & Remote Access:** Comfortable using Linux/Unix terminal for basic system navigation, log review, configuration, and secure remote connections via SSH

Additional

- Python (beginner), HTML/CSS
- Adobe Creative Suite (Photoshop, Illustrator, InDesign, Premiere Pro, After Effects)

- FTP (Cyberduck), GitHub, Monday.com, Notion
- Prompt Engineer, Figma, Microsoft word, Microsoft Excel

CORE STRENGTHS

- **Problem-Solving:** Creative and analytical thinker with strong technical reasoning
- **Visual Communication:** Able to present complex data clearly using diagrams and reports
- **Dependability:** Known for being calm, reliable, and deadline-focused
- **Growth Mindset:** Receptive to feedback, highly motivated to learn and mentor
- **Team Collaboration:** Enjoy working cross-functionally; exploring quiet leadership roles

PROFESSIONAL DEVELOPMENT

- Completed Google Cybersecurity Certificate
- 3-month cybersecurity capstone lab with focus on SOC workflows
- Active contributor to GitHub portfolio projects (SOC tools, Python, visual reporting)
- Building presence on LinkedIn and developing personal branding

EDUCATION

Faculty of Architecture and Design

La Universidad del Zulia

2010 – 2015 | Maracaibo, Venezuela

Google Cybersecurity Certificate

Coursera

2024 – 2025 | Stamford, CT
